Michigan State University, East Lansing, MI   December 2022
Bachelor of Science, Computer Science
GPA: 3.70; Major GPA: 4.00;
Key Courses: Algorithms and Data Structures, Computer Organization and Architecture, Software Design, Mobile Application Development.

Work Experience

The Shumaker Technology Group   June 2021 - Present
Web Developer, Lansing, MI

- Created and managed municipal and small business Web Applications and Websites using WordPress and other technologies such as HTML, CSS, and Javascript.
- Used Elementor, a WordPress page builder, and many other plugins to help build and design each website in a simple way that can be easily taught to clients who may want to maintain the website on their own after the site is put on the web.
- Learned about the latest Web design and layout techniques to provide users with easy navigation, an eye-catching design, and great responsiveness across all devices.

Jimmy Johns Franchise, LLC   May 2019 - June 2021
*Delivery Driver***,** Plymouth, MI

- Worked full-time as both a delivery driver and sandwich maker helping me develop good customer service skills.
- Worked part-time during school as well which challenged my time management which helped me maintain a proper work-school balance.
- Taught me how to efficiently manage a chaotic and busy environment through multitasking and keeping a cool head when things get out of hand.

College Works Painting   Summer 2018
Crew Team Leader, Northville, MI

- Lead various residential painting jobs and performed tasks including exterior/interior painting, power washing, and deck staining.
- Provided clients with a thorough look-over after every job to assure the quality was up to standards and worked out any concerns they had.

Academic Projects

Frogger-style MFC Game Application   Spring 2021

- Worked in a team where we designed and developed an MFC Frogger-type game in a sprint-based work cycle by dividing up parts of the project and dispersing certain tasks to each member at each sprint.
- Communicated with teammates on the added code of the project after each sprint, and discussed the current direction of the project and what the next steps should be.
- Used unit testing on core program functionality to aid implementation.
- Taught me how to break down a very large project into pieces and develop it incrementally.

Skills

Proficient Languages: C/C++, Python, Java, HTML/CSS
Software/Tools: Visual Studio, Pycharm, WordPress, Git, Android Studio
